PERSONAL PROJECTS

Youtube Clone

- A YouTube clone made using HTML and CSS which is completely responsive, where the page will be adjusted automatically to various screen sizes. While developing the youtube clone I learnt HTML and CSS.

Chrome Extension

- Chrome Extensions are add-ons for browsers such as Google Chrome, built using web technologies like HTML, CSS, Javascript.
- I created a chrome extension which can be used to store urls and any data, it uses local storage of browser to save the data.

UNIVERSITY PROJECTS

Objection detection and range calculation with Radar

- A radar system was developed using Arduino, a servomotor, and an ultrasonic sensor. It can detect the position and distance of obstacles and present the information visually.
- The system has applications in robotics for object detection and avoidance, as well as intrusion detection for specific areas. The range of the system is determined by the HC-SR04 ultrasonic sensor, which has a range of 2 to 40 cm.
